Valley Pool Consultants also offers weekly **POOL SERVICE** and **REPAIRS** in the **Northwest Valley**. Who better to maintain your pool in proper working order than those that build and design swimming pools? Owning a pole, net and brush does not make a pool service person. It is important to have someone with the knowledge of pool hydraulics, salt systems, deck equipment and interior finishes servicing your pool and/or spa. We have the ability and knowledge to repair most pool equipment which allows us to save you time and money when a breakdown does occur. We also have the skills to operate the pool properly to prevent failures in the first place, but when they do, we are on the job quickly.

Prices for FULL SERVICE Start at \$75.00* a month

Full Service Includes:

Test chemical balance each visit

Add chemicals to adjust and maintain, acid to adjust PH included.

(chlorine, conditioner, clarifiers, DE, salt are additional charges except with *Balanced Billing*)
